

RM CAGE

The RM Cage is purpose-built for riders who demand security and convenience from their hydration system. Designed specifically for behind-the-saddle placement, it delivers exceptional retention strength proven through extensive testing. Its innovative reverse hook design ensures bottles stay locked in when the road gets rough, yet allows for smooth, effortless access when you need a drink.

At just 62.7g, the RM Cage offers lightweight durability and is specifically compatible with rear or inverted mounts, making it the ideal choice for serious cyclists who won't compromise on performance or reliability.
