

BASE BAR

WING ULTIMATE S

WITH A3 BRACKET

The Wing Ultimate S is our new halo level bar – a return to the integrated stem concept that we pioneered with the Carbon-X over 20 years ago. The Wing Ultimate S offers full carbon construction and a variety of cable routing options

The Wing Ultimate S is sold as a basebar only, allowing the rider to choose their optimum configuration from our extensive range of options

The Wing Ultimate S has been designed to maximise aerodynamics within the updated UCI rules, offering a measurable improvement compared to a 3:1 design. It also drops a significant amount of weight compared to the Aeria Ultimate.
