

# Cinturato™ ALL ROAD

SMOOTH AND FAST RIDING

## TECH HIGHLIGHTS:

TUBELESS  
READY

## DESCRIPTION:

The Cinturato™ All Road is the gravel choice when **tarmac**, hardpack trails or **light gravel** are on your way. Featuring a **reinforced and sturdy tubeless-ready 60tpi carcass** plus a **bead-to-bead protection layer**, it is designed to resist lateral cuts on different grounds. A slick central line encourages **fast and smooth riding on tarmac and pavement**. **Progressively higher small paddle-knobs** are designed provide solid traction on light gravel, while more aggressive and solid knobs, derived from our Scorpion™ range, built for cornering confidence when leaning. All coupled with the **ProCompound Gravel**, a mix of polymers developed for extended mileage. The combination of the tread design together with the compound prioritizes **traction and grip** for quick riding on any surface either in town or countryside.

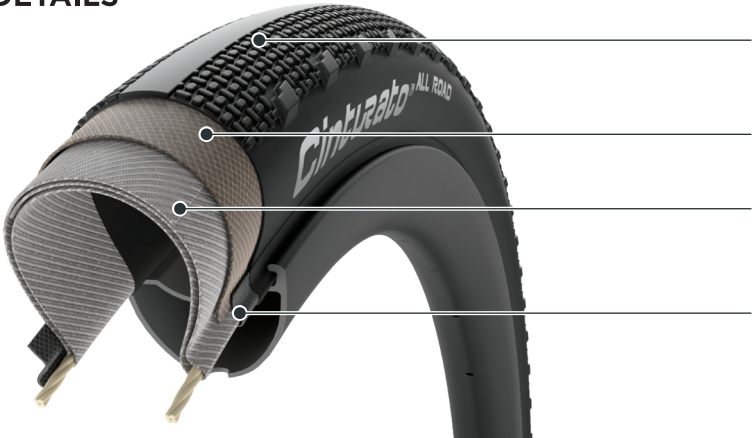

## CHARACTERISTICS:

Best suited for DRY & WET

■ INTENDED USE    ■ POSSIBLE USE    □ NOT INTENDED USE

## DETAILS

- ProCompound Gravel formulation to provide consistent and extended mileage
- TechWALL High-strength woven Nylon fabric from bead to bead for added cut and puncture protection
- Multi-ply 60tpi Nylon casing construction
- TLR tubeless-ready aramid folding bead optimized for wide rims and lower pressure riding

# Cinturato™ ADVENTURE

FREE TO RIDE EVERYWHERE

## TECH HIGHLIGHTS:

TUBELESS  
READY

## DESCRIPTION:

Built to cover a wide range of condition, the Cinturato™ Adventure aims to be the perfect travel buddy for your **bikepacking adventures**. Featuring a **reinforced and sturdy tubeless-ready 60tpi carcass** plus a **bead-to-bead protection layer**, it is designed to resist lateral cuts on different grounds. Lighter on the central part and more aggressive on the shoulder, the **knobs are off-road oriented** to promote rider support from light gravel to extensive trips. All coupled with the **ProCompound Gravel**, a mix of polymers developed for an extended mileage. The combination of the tread design together with the compound prioritizes traction and grip on different surfaces designed to allow the rider to go everywhere.

## TECH OVERVIEW

### 1 Compound

**PRO COMPOUND**  
GRAVEL

➤ Mixture of polymers that are maximized in a single compound layer ➤

GRIP, TRACTION  
AND DURABILITY  
FOR CONSISTENT  
AND EXTENDED  
MILEAGE

### 2 Structure

**TECHWALL**  
GRAVEL

➤ 60tpi tubeless-ready gravel-specific casing with an added bead-to-bead of anti-puncture fabric ➤

SOLID AGAINST  
LATERAL CUT  
ON DIFFERENT  
GROUNDS

**PRO COMPOUND**  
GRAVEL

*ProCompound Gravel features a mixture of polymers that are maximized in a single compound layer to provide grip, traction and durability for consistent and extended mileage. This formulation is at its best when the gravel application requires both good speed and off-road riding skills, especially when bikepacking.*
