DESCRIPTION:

The **SmarTUBE X** is Pirelli's latest innovation in the world of tubes, as we strive to improve performance in modern cycling. They are the result of our development for World Tour tubulars, now made available for everyday rides with clinchers. Made from a thermoplastic polyurethane (TPU), it can save up to **70% of the weight** of a general butyl tube and almost **50% of the space** in your pockets, while being stronger than butyl as a raw material.

SmarTUBE X is at least **3 times** thicker than a regular SmarTUBE, giving you the benefit of being agile and quick while still being extremely protected, this allows you to face any type of obstacle on your fast commuting or casual rides.

SmarTUBE X comes with either a **Presta** or a **Schrader valve**, available in a comprehensive range of heights to fit every rim and set-up.

APPLICATION:

Intended for fast commuting, or endurance oriented set up in combination with our Cinturato™ or Angel™ Tyres.
